

3scale demos Google AppEngine Integration and new Services at Google I/O

SAN FRANCISCO, May 27/28th, 2009 – As one of Google I/O's Sandbox demonstration partners, 3scale showcases its code plugins for the Google AppEngine platform which allow rapid deployment of AppEngine powered API services with out of the box access control, monitoring, analytics, payment and billing based on 3scale's CONNECT platform.

The updated code plugins function for both the Python and Java AppEngine and provide a fast track way to integrate powerful API management features into API based Web Services. The plugins are launched together with two services leveraging the new combined platform:

- The AppSpotImage service (<http://www.appspotimage.com/>) that uses the Python AppEngine and delivers AppEngine's Image manipulation tools via a simple REST API. The service comes with detailed tutorials and information on how to launch an API service using AppEngine and 3scale.
- The new UNDATA API project service (<http://www.undata-api.org/>) powered by the Java AppEngine and 3scale which provides an unofficial public API for the wealth of data available publicly through the UNDATA initiative (<http://data.un.org>). The service launches with initial data sets from the World Health Organisation and will expand the number of available data sets over time.

Both services are for free public use and service code is available to developers interested in creating similar services.

3scale's will be on the AppEngine product stand at Google I/O on the 28th of May and further information about products and services is available from <http://www.3scale.net/>.

About 3scale

3scale networks S.L. (<http://www.3scale.net>) provides mission critical infrastructure for the programmable web. The company's system opens up new business opportunities for deployed Web Services via its API management solution, allowing cost-effective flexible monitoring, access control and billing of Web APIs. 3scale's mission is to act as a key enabler in the emerging Web Services market. Established in May 2007, the company has offices in Barcelona, Spain, and Sunnyvale, CA, USA.

3scale's CONNECT products provide out of the box API management solutions at a range of price points from Free services to custom installations with dedicated high capacity hardware.

About Google I/O

Google I/O (<http://code.google.com/events/io/>) is a Google Inc. largest annual developer gathering focused on pushing the boundaries of web applications using Google and open web technologies. The event comprises two days of showcases of the latest web technologies and applications with in-depth breakout sessions and informal Q&A at Fireside Chats.
